Impact assessment toolbox of resilience-enhancing strategies on farming systems

Resilience Assessment tool to assess the capacity of policies to enhance the resilience of EU farming systems

A methodological approach to assess the contribution of risk management to resilience of EU farming systems

The DEMETER Agricultural Information Model

Impact of diersification and databases of European diversification field experiments and experiences

Spatial econometric models for evaluating RDP measures

Methodology for evaluating social innovation in rural areas

Methodological tool to evaluate farm performance

A methodological tool for the ex post evaluation of past CAP reforms based on FADN data

A methodological tool for the ex ante evaluation of CAP reforms based on FADN data

Methodology for assessing the impact of adopting organic farming on farms' economic and environmental performance

Methodology for mapping the distribution of small farms in Europe

Crop type map

Crop area and crop production estimation for small farms

Methodology for quantification of the contribution of small farms to local food systems and food and nutritional security

Participatory foresight analysis on the future potential role of small farms and small food businesses in food and nutrition security

Sustainability indicators at the farm level for monitoring and evaluating the CAP

The FLINT Farm Return data recording system

MIND STEP Database and Model Interfaces

Data interoperability for farmer performance measurement tool

NEW IACS VISION IN ACTION

MIND STEP

The DEMETER Agricultural Information Model

Methodology for impact evaluation of digitalisation

Methodology for evaluating social innovation in rural areas

Database: Social innovations in marginalised rural areas

Impact of diersification and databases of European diversification field experiments and experiences

Methodology for quantification of the contribution of small farms to local food systems and food and nutritional security

Participatory foresight analysis on the future potential role of small farms and small food businesses in food and nutrition security

Sustainability indicators at the farm level for monitoring and evaluating the CAP

The FLINT Farm Return data recording system

Data interoperability for farmer performance measurement tool

MIND STEP Database and Model Interfaces

A searchable GHG emissions data repository

Country synthetic plots of GHG time evolution and summary factsheets

The DEMETER Agricultural Information Model

Methodology for impact evaluation of digitalisation

Water abstraction monitoring maps

Drought forecasting based on seasonal climate forecasting in combination with hydrological and crop growth models

Databank to support the implementation and monitoring of the Water Framework Directive

Maps of crop-types, non-productive EFAs, permanent pastures and of farming activities

Geotagged photos to complement Earth Observation data

Soil property map

An Earth Observations based Environmental Performance Tool

Tool for automated support system to monitor agricultural funding sites

Impact assessment toolbox of resilience-enhancing strategies on farming systems

Resilience Assessment tool to assess the capacity of policies to enhance the resilience of EU farming systems

Impact of diersification and databases of European diversification field experiments and experiences

Analytics on vegetation and soil index time-series

Cultivated crop type maps

Grassland mowing events detection

Methodology for evaluating social innovation in rural areas

Database: Social innovations in marginalised rural areas

Methodology for assessing the impact of adopting organic farming on farms' economic and environmental performance

Map of tillage changes

Crop type maps

Yield and biomass maps

Map of irrigated and non-irrigated areas

Sustainability indicators at the farm level for monitoring and evaluating the CAP

The FLINT Farm Return data recording system

IMAP4AGRI

Crop type map

Grassland mowing detection tool

Vegetation status indicator tool

Agricultural practices monitoring product

Markers Database

An inventory of farming practices and their impacts on the environment and climate

The INSPIRE Database and Geoportal

Methodology for mapping the distribution of small farms in Europe

Crop type map

Crop area and crop production estimation for small farms

MIND STEP Database and Model Interfaces

Agro-environmental monitoring tool: Operationalising agro-climatic and agro-environmental indicators

Earth Observation monitoring and traffic lights tool

A farm registry tool for exchanging information and data among databases

Data interoperability for farmer performance measurement tool

Agricultural Biodiversity Trend Monitoring

CLIMATE CHANGE ACTION

Water abstraction monitoring maps

Drought forecasting based on seasonal climate forecasting in combination with hydrological and crop growth models

Databank to support the implementation and monitoring of the Water Framework Directive

Maps of crop-types, non-productive EFAs, permanent pastures and of farming activities

Geotagged photos to complement Earth Observation data

Soil property map

An Earth Observations based Environmental Performance Tool

The DEMETER Agricultural Information Model

Inventory of digital tools and their potential socio-economic impacts

Tool for automated support system to monitor agricultural funding sites

Impact of diersification and databases of European diversification field experiments and experiences

Spatial econometric models for evaluating RDP measures

Analytics on vegetation and soil index time-series

Cultivated crop type maps

Identification of organic farming practices

Methodology for evaluating social innovation in rural areas

Database: Social innovations in marginalised rural areas

Methodology for assessing the impact of adopting organic farming on farms' economic and environmental performance

Map of tillage changes

Crop type maps

Yield and biomass maps

Map of irrigated and non-irrigated areas

Sustainability indicators at the farm level for monitoring and evaluating the CAP
