

1. Introduction

Focus Area (FA) 5B is designed to increase efficiency in energy use in agriculture and food processing.

The main support provided by RDPs takes the form of aid to physical investments in, for example, in new or upgraded of machinery. This can be complemented with measure that enhance the knowledge and skills of the relevant stakeholders to improve efficiency in the use of energy.

The target is to mobilise 3 billion EUR of public and private investments to contribute to a more efficient use of the energy.

2. Expected achievements

This section provides information on the common target indicator defined for the Focus Area and examples of programme-specific target indicators defined by some RDPs to complement the common targets indicators.

In addition to the common targets set at EU level, Member States may set programme specific targets which reflect their particular circumstances. Some examples of these indicators are provided below.

2. Expected achievements

This section provides information on the output indicator. Data provided is aggregated at EU level for those RDPs setting the indicator.

 Main output indicators	EU Total
Total public expenditure in cooperation (M16)	36 mill EUR
No of beneficiaries trained in issues related to the Focus Area	32 845
No of beneficiaries advised in issues related to the Focus Area	19 565
No of operations supported for investment (in agricultural holdings, in processing and marketing of ag. Products)	18 173

4. Intervention logic at EU level

In 2014-2020, measures within Rural Development Programmes can contribute to several Priorities and Focus Areas in a flexible manner. The following charts provide an indication of the most commonly used measures to address Focus Area 5B, as well as an indication of the number of RDPs in which these measures are selected. For a full overview of the Measures activated under FA 5B see section 6.

5. Example of RDPs' intervention logic

This section provides two examples of the intervention logic followed by RDPs which illustrate alternative approaches to addressing the objective of improving energy efficiency.

6. Measure mix per Member State

The following table shows the weight that each Member State has given to the various measures available in order to achieve the targets set for this Focus Area. Highlighted cells indicate the highest budget share allocation per MS. The last row presents the EU-28 planned total public expenditure for each measure (million EUR).

Source of information: All data presented in this summary comes from the European Commission-approved 2014-2020 Rural Development Programmes (118 RDPs in total). In this fiche, public expenditure means total public expenditure (= EAFRD + Member States matching funds + any national top-ups). Due to rounding, there may be small discrepancies between some figures presented. Data includes programme modifications until March 2016. Out of the 118 Rural Development Programmes only the 112 national and regional Programmes have been considered because National Frameworks and National Rural Network Programmes do not allocate budget on Measures. Please note that data and calculations provided do not include M20 (Technical Assistance), or M18 (Complementary payments to Croatia). Icons source: www.flaticon.com
