Glossary

What's the purpose of the logic models in the Guidelines?

Logic model for setting up the counterfactual

What evaluation approaches are possible in 2019?

Examples of evaluation approach

Approach A

- Optimal data situation
- For 2019 / ex post
- Advanced / rigorous

Approach B

- Alternative in case of data-gaps or if other hindering factors
- Often includes qualitative component

Other approaches

- Various approaches (listed in logic models)

→ Choice depends on RDP size, uptake, data availability and resources for evaluation!

Why aren't the
Guidelines
recommending more
qualitative approaches?

Use of qualitative approaches

- **As alternative** to quantitative approaches when data are missing.)
- **As a complement** to the quantitative assessment to explain how and why certain impacts have been achieved
- **To triangulate/validate findings** obtained from the quantitative assessment

FAQ

What are the expectations in terms of assessing the contributions to the EU2020 headline targets?

How to assess the RDP's contribution to EU 2020 headline targets?

Assess RDP's potential to contribute to headline target:

1. **Understand** the intervention logic of CEQ;
2. **Screen** the RDP measures contributing to target;
3. **Compare** the RDP potential with actual achievements.

Assess RDP's actual contribution to headline targets:

1. **Review** the common evaluation elements;
2. **Calculate** the values of indicators;
3. **Combine** values of indicators to assess overall contribution to the headline target.

FAQ

Why is the SFC-
template not following
the structure of the
fiches for answering
the CEQs?

CEQ-Fiches follow logic steps...

- 1 Clarification of RDP intervention logic linked to the CEQ
- 2 Consistency check between CEQ, judgement criteria and indicators
- 3 Description of methodology to answer the evaluation question
- 4 Identification of data needs and sources for common and suggested additional impact indicators
- 5 Provision of solutions to possible challenges/risks/issues
- 6 Provision of answer to CEQ
